Learning Guild, member

Profile

Rania is the CEO and Co-founder of Alpha AI Consulting (<https://www.alphaaic.com>), where she leads the firm's strategic vision, growth, and delivery of AI-driven solutions that enable business transformation, innovation, and operational excellence. In this role, she advises organizations on AI strategy, digital transformation, and responsible technology adoption, while building high-performing, multidisciplinary teams across regions. Previously, Rania was a Certified Manager and Expert Learning Consultant at IBM Consulting, where she built a distinguished career spanning over 20 years in global leadership, functional management, consulting, and information technology. She holds a Bachelor of Engineering (B.E.) in Electrical, Electronics, and Communications Engineering and brings deep expertise in developing enterprise learning platforms and applications that support large-scale transformation initiatives. She is skilled in strategic planning and execution, business process transformation, IT strategy, education design and development, test management, and automated software testing. During her tenure at IBM, Rania held multiple leadership roles, including Global Education Development Leader, Functional Manager, Product Owner, and Project Manager, leading complex, multi-portfolio programs across geographies. She built strong executive-level stakeholder relationships, provided expert learning and transformation advisory, and regularly presented to senior leadership teams to drive alignment and consensus. She is known for designing and executing strategic learning ecosystems that blend education, exposure, adaptive learning, and experiential models—driving both professional growth and measurable business outcomes.

Key skills

- Executive & Strategic Leader

Design and lead enterprise-wide AI strategies that align innovation with business growth, risk management, and long-term digital transformation. Drive organization-wide modernization by embedding AI into operating models, governance structures, and decision-making processes, enabling responsible and scalable adoption. Serve as a trusted executive advisor, guiding leadership on AI investments, governance design, and translating board-level vision into practical, enterprise-grade implementation.

Design comprehensive AI and data governance frameworks that define clear roles, accountability structures, and decision-making workflows across the enterprise. Establish trusted data foundations through ownership, quality, and lifecycle controls while embedding transparency, explainability, and ethical safeguards into AI systems. Implement structured risk identification and mitigation strategies to ensure resilient, compliant, and responsibly governed AI deployment.

Design and deploy advanced AI solutions leveraging large language models, multi-agent frameworks, and retrieval-augmented architectures to address complex business challenges. Lead end-to-end AI product development from prototype to scalable deployment, integrating multiple models, APIs, and cloud services into

secure, production-ready environments optimized for performance, governance, and cost efficiency.

Evaluate AI initiatives through rigorous financial modeling, ROI frameworks, and capital allocation analysis, quantifying risk, opportunity, and scalability trade-offs to support data-driven executive decision-making.

Lead the launch and scaling of AI-driven ventures by identifying market opportunities, validating product-market fit, and building sustainable growth models. Establish strategic partnerships across technology and commercial ecosystems while developing high-impact technical proposals and structured delivery frameworks aligned with enterprise governance and execution standards.

- Global Education Development Leader

Develop strategies for improving customer experience ensuring that all learning content is deeply engaging to the IBM Consulting learner

Continuously push the boundaries of conventional thinking to explore new technologies like AI to improve speed and efficiency

Regularly communicate status updates on projects across all levels of the organization up to L&K executives

Utilize advanced problem solving techniques such as root cause analysis to quickly resolve complex issues

Assist with interviewing prospective employees, helping select qualified individuals who fit into the team culture

Analyze system architectures from both functional and non-functional perspectives in order to improve scalability

Identify opportunities for process optimization by analyzing existing processes and suggesting alternatives

Adhere to industry standards in terms of accessibility standards and mobile solutions

Collaborate effectively with cross-functional teams to design, and develop our learning solutions

Conduct performance reviews for ED DEV Leaders in order to provide feedback and guidance for improvement

- Functional Manager skills

Manage resources and budget

Ensure that goals and objectives align with the organization's overall strategy and vision

Provide necessary tools, coaching and education

- Business Intelligence and data analysis skills

Create BI workflows and integration between tools

Build meaningful dashboards that help drive informed decisions

Provide metrics and bench marking data around education development effort and spend

- Process optimization skills

Analyze current processes

Prepare process modeling & flowcharts

Design future state

Restructure processes & drop unnecessary tasks to achieve cost cutting and time saving flows

- Product Owner/Sponsor skills

Define Agile team stories

Prioritize the Team Backlog to streamline the execution of program priorities while maintaining the conceptual and technical integrity of the Features or components for the team

- Project Management skills:

Lead different teams through business and technical assignments

Build a strong relationship with clients and maintain strong stakeholder management

Develop efficient communication plans

Participate in revising DOUs, SOWS and SD (solution design documents)

Lead change management

Prepare staffing and work plans

- Business analysis skills

Business requirements gathering/analysis, prepare/approve Solution design documents

Revise/approve high level design, verify/validate requirements

Plan business/verification/validation workshops

Key courses and training

Work experience

Co-Founder & CEO

Alpha AIC Consulting | June 2024 – present

Founded and lead an AI-native advisory and product innovation firm focused on enterprise AI strategy, governance, and advanced AI system architecture. Drive end-to-end AI transformation initiatives — from executive strategy and governance design to hands-on system development and scalable cloud deployment.

Spearhead the design of enterprise AI governance and data governance frameworks, defining accountability models, risk controls, responsible AI principles, and structured approval workflows. Advise executive leadership teams on AI investment strategy, operating model design, and risk-aware implementation.

Architect and deploy advanced AI solutions leveraging large language models, multi-agent systems, and retrieval-augmented architectures. Lead AI product development from concept to production, integrating multi-model APIs and cloud platforms into secure, scalable environments.

Develop ROI-driven AI business cases, financial models, and phased delivery roadmaps to ensure measurable impact and disciplined capital allocation. Build strategic partnerships and deliver high-impact technical proposals aligned with enterprise execution standards.

IBM Consulting L&K Global Education Development Leader

IBM, Canada | Sep 2016 – Apr 2024

Lead a number of Global Initiatives in the "Future Operating Model"

Lead a huge team revamp from "borrowed" to "captive" headcounts which will bring in a lot of quantitative as well as qualitative advantages

Develop strategies for improving customer experience through user interface design , and availing business examples of all interactivity widgets to the team in the Learning Objects Catalogue

Lead a huge process optimization and education describing the ED DEV Ways of working among all different stakeholder

Organize ED DEV All Hands calls to maximize productivity and efficiency

Establish frameworks to drive L&K different strategies

Transform the way we deliver our solutions: Lead a transformation journey from one LMS to another that is more advanced, provides better user experience, integrates with IBM ecosystem and is cost efficient

Lead the shift from classroom to virtual training by adopting new technologies for education development and delivery

Meet regularly with business partners, listen to the need, and find solutions to complex problems

Foster an environment where the team is continuously challenged, engaged, valued and recognized

Introduced new measures to comply with D&I requirements of mandatory education

Manage the Education Development team budget, and balance the spend between skills, tools and platforms.

Manage 5 Agile teams, 117 resources from different technical roles through a collaborative environment and communication
Cultivate an innovation environment, by creating a new team specialized in innovation, and direct all requirements to this team. I am the Product owner of this team, and I manage prioritization of Backlog ideas
Optimize and automate resource management processes that shift significant time (thousands of hours) from administrative tasks to more value-added ones
Identify and mitigate financial risks associated with some ED DEV DoUs
Manage, Lead, and Support new tools and platforms for better education retention & short time-to-market

Learning Consultant : EA/AD&I and Industries

IBM, Saudi Arabia | Nov 2014 - Aug 2016

Partner with Service Line Leads and all industry leads , to understand their business imperatives and to identify the targeted practitioners population for each education
Identify the practitioners that need to be cross skilled between different lines.
Team with Global consultants to understand global trends, educational approaches, and best practices.
Attend weekly interlock call , and F2F workshops, and contribute to Global L&K strategy
Build self eminence as a trusted business advisor, tailor curriculums to enable strategic growth plays in CAMSS for different service lines
Develop Architect general road map showing levels, education and experience needed to move from one level to another, promote global SAP/Oracle/MS Dynamics/Industry/ BlueMix/Agile/DevOps road maps for each role, and contribute to and promote Industries education roadmap.
Deliver a structured curriculum that guarantees career progression from one level to another, and work with business partners to include this education in PBC goals
Gather quantitative and qualitative metrics when applicable and report back to the business for action
Comply with projects requirements and conduct local F2Fcourses when needed,register practitioners in private or public live virtual classes, and send industry leads to global events
Provide continuous training/demos on the use of the virtual learning hubs, and meet adoption percentage of SAP/Oracle Virtual learning programs for each quarter
Provide support to different Virtual learning programs, and raise technical support tickets when required, and provide feedback to Global partners to include extra material in Virtual Learning Hubs
Help in building/enriching a knowledge management base for L&K Team through continuous update of the team room, and other tools like the EPAD for quarterly budgets, ICA webportal, and connections activities for different events
Work on securing quarterly budgets for all learning activities
Support MEA L&K to contribute to L&K 2015 to become a Globally Integrated function
Help in creating responsive/attractive wiki pages in L&K community

IPPF Project - SA Focal & IPPF MEA PM

IBM, Saudi Arabia | May 2014 - Oct 2014

Coordinate all project activities with the WW PM

- Lead other focal points in all MEA countries , collect and incorporate data validation inputs into master documents
- Develop full understanding of Prophet and prepare the " Process Definition Document" of the IPPF tool used for impact analysis
- Participate in configuration workshops, and in financial and operational discussions of some introduced clip levels
- Lead S.A. data validation and analysis of the IPPF data load from different resources (CFTS, SC Manager, and Prophet)
- Extract the required fields from Prophet/project view for data validation purposes
- Work very closely to the program Manager Warwick Philips and shadow him in different activities
- Participate in leveraging and tailoring of IPPF MEA training materials and presentations
- Prepare the training schedule and plan, and communication plan with the project executives and the WW PM
- Prepare data validation summary report for all MEA countries
- Support SA submissions for September, and achieve the highest rate in MEA

SEHE Bid and Proposal Manager

IBM, Saudi Arabia | Mar 2014 - Apr 2014

- Coordinate bid activities and meetings within SEHE consortium starting with the RFP
- discussions and ending with technical write up and financial proposals
- Discuss and prepare RACI with the consortium companies
- Prepare of DB2 (Deal board 2)with the opportunity owner
- Prepare the resources plan and attend the RDM revision
- Contribute to some sections in the technical proposal related to project management and project governance structure
- QA on technical responses and incorporate SME notes
- Follow up with SWG and GTS to get their parts on time
- Participate in the preparation of the teaming agreements between different companies in the consortium
- Revise MOU with vendors
- Lead infrastructure and sizing discussions with SWG and GTS

HESN Project Rollout/Code Merge Lead

IBM, Saudi Arabia | Jul 2012 - Mar 2014

- Lead meetings with IBM Canada for the Solution Design/ DOU discussion of the new release of HESN (Panorama)
- Prepare the deployment plan for the new release including third party software upgrade
- Plan the function/configuration/and data migration testing of the new Rollout
- Prepare project documents to include project scope , timeline, communication plan, risk management
- Identify stakeholders and prepare governance structure
- Maintain excellent relationship with MoH Project Manager and obtain sign off deliverables
- Align the Project plan with the delivery schedules from IBM Canada and third party company (GVC)

Conduct kick-off meeting and weekly project status update meeting
Report on project performance for both the client and internal auditors
Maintain the momentum and engage stakeholders in different project activities
Manage the roll out team and coordinate different activities and revisions with IBM Canada and local team
QA on all work products provided by IBM Canada and third party (GVC): SDs ,Workbooks, and many others.
Revise and approve time sheets of third party contractors, and manage procurement activities
Coordinate with the MoH stakeholders different workshops to gather configuration requirements, and many UAT sessions for the new configurations (by GVC) and Enhancement requests (by IBM Canada)
Monitor project execution and apply Quality standards and procedures
Perform some technical configuration activities (Immunization Forecaster), and Vocab Domain/Arabisation configurations
Supervise the training and plan the training in health regions
Supervise the performance of Roll out team and provide guidance
Solve a number configuration issues that was reported through the HESN AMS project

HESN Project Change Management Lead

IBM, Saudi Arabia | Jul 2011 - Jul 2012

Participate in selecting a frame work for the change management in the project, and in defining the change management strategy/methodology
Fully understand business processes/functions in Panorama, and the existing processes in MoH and then perform gap analysis and prepare a change vision
Work closely with business people in preparing Panorama (HESN in KSA) training manuals
Organize communication activities that portrait Panorama benefits, and project vision
Work closely with business analysts and gather configuration information
Develop full understanding of HESN in order to play a role in the training
Conduct different workshops for evaluating current internal communication processes and feedback methods
Build strong relations with the customer and form different leadership groups
Work with project teams to integrate change management activities into the overall project plan.
Create and enable reinforcement mechanisms and celebrations of success
Conduct several executive presentations
Conduct readiness assessments, evaluate results and present findings in a logical and easy-to-understand manner.
Organize communication activities that portrait Panorama benefits, and project vision
Participate in planning governance, communication, training, resistance, and rollout
Be an active and visible coach to executives leaders who are change sponsors.

Computer software Testing Manager/QA Manager

EJADA, Saudi Arabia | Dec 2005 - Apr 2010

Establish full understanding of different applications in a diversity of fields, from banking

(IPO- Initial Public Offering- different Banks in KSA), to transportation (T&R – Ticketing and Reservation-Saudi Railway Organization) to HR software applications (RSMResource Skill Matrix) to cargo applications (Saudi Railway Organization)

Establish full understanding of customer business requirements and mapping them to equivalent test cases

Plan and organize the testing of development software systems in cooperation with project managers

Communicate with customers and /or business analysts in case of any vague, incomplete,or un-integrated business requirements

Hold interviews for recruiting Testing personnel

Assign Testing resources with different roles for each software development project

Monitor and control Testing activities for all types of testing (functional, performance,security, usability, maintainability) in different projects

Analyse Testing results, prepare reports, and take appropriate actions accordingly

Evaluate the performance of Testing team , and prepare appraisal reports

Keep updated with all new introduced tools released for different testing types

Hold periodic training workshops for testing team on different testing tools
